“Rescue 1, Engine 1, respond to one-five-one-one southwest one-six street in reference to a medical emergency. Rescue 1, Engine 1 respond to fifteen eleven southwest sixteenth street in reference to a medical emergency. Time out 1400 hours.

“Rescue 1, Engine 1, responding.”

“Rescue 1 and Engine 1, you are responding to Center City Community College in reference to a possible anaphylaxis patient. We have received several calls for respiratory difficulty and shortness of breath; we are unsure if it is the same patient or more than one. We are attempting to call back for further information.”

“Rescue 1, Engine 1, acknowledge.”

“Rescue 1 and Engine 1 we are now being advised that there are several victims outside of the main auditorium area. Campus security has been notified and is en route.”

“Rescue 1, Engine 1, acknowledge.”

“Rescue 1, Engine 1, on scene investigating.”

**On-scene arrival information: (visual prompt with info cards)**

Give the learners the site map and information card 1.

Read the following to the team:

**Scenario 1, Information Card 1**

Upon arrival, as you approach the auditorium area through the parking lot, you see approximately 30 people staggering, away from the auditorium, towards the parking lot. Some of the victims are assisting others as they walk; all appear to be in distress at this time. Additionally, you see a campus security vehicle in front of the auditorium with its emergency lights on. You do not see the security officer. There is no visible smoke or vapor in the area. The auditorium doors are closed and you see no evidence of any other hazards at this time. As you continue your size-up from your vehicle, you notice several of the victims are now on the ground. Dispatch is now advising that security has cleared the building.

Give to the learners a laminated map of the area and dry erase marker so they may indicate vehicle location, staging areas, DECON etc.

Give to the learners a card with the above information printed on it as a reference.
